**SELECTED ACQUISITION REPORTS - HIGHLIGHTS**

**(As of September 1992)**

The Department of Defense has released details on major defense acquisition program cost and schedule changes since the June 1992 reporting period. This information is based on the Selected Acquisition Reports (SARs) submitted to the Congress for the September 1992 reporting period.

SARs summarize the latest estimates of cost, schedule, and technical status. These reports are prepared annually in conjunction with the President's budget (as of December). Subsequent quarterly exception reports (as of March, June, and September) are required for those programs experiencing unit cost increases of at least 15 percent or schedule delays of at least six months. Quarterly SARs are also submitted for initial reports, final reports, and for programs which are rebaselined at major milestone decisions.

The total program cost estimates provided in the SARs include research and development, procurement, and military construction. Total program costs reflect actual costs on delivered items as well as anticipated costs for future acquisitions. All estimates include allowances for anticipated inflation.

The current estimate of program acquisition costs for programs covered by SARs for the prior reporting period (June 1992) was \$924,474.9 million. There was a net cost decrease of \$344.8 million between June 1992 and September 1992. These changes are summarized below:

	<u>Current Estimate</u> <u>(\$ in Millions)</u>
<b>June 1992 (92 programs)</b>	<b>\$ 924,474.9 1/</b>
Changes Since Last Report:	
Economic	\$ +0.2
Quantity	-438.9
Schedule	+87.3
Engineering	+28.7
Estimating	-83.1
Other	0.0
Support	<u>+61.0</u>
Net Cost Change	\$ -344.8
<b>September 1992 (92 programs)</b>	<b>\$ 924,130.1 1/</b>

*1/ Excludes the Army's ASAS and BAT programs due to classified costs.*

There were 12 quarterly SARs submitted for the September 1992 reporting period. Reasons for submission and summaries of program changes are provided below.

**AH-64 (APACHE)** -- This is the final SAR for APACHE. The program is more than 90 percent complete and reporting can be terminated in accordance with Section 2432, Title 10, United States Code. The final estimated cost decreased \$3.3 million (-0.03%) from \$11,748.1 million to \$11,744.8 million, due primarily to revised production support funding.

**LASER HELLMIRE** -- The SAR was submitted because of schedule delays of more than six months. Due to a warhead timing problem which surfaced late during development testing, a decision was made to continue development of the HELLMIRE Optimized Missile System (HOMS) until the problem is resolved, and not to award the low rate initial production contract. The estimated costs for the program decreased \$9.8 million (-0.4%) from \$2,398.8 million to \$2,389.0 million, due primarily to a revised procurement estimate which was partially offset by an increase in the HOMS development estimate.

**PATRIOT** -- This is the final SAR for PATRIOT. The program is more than 90 percent complete. The final estimated cost increased \$10.9 million (+0.09%) from \$12,137.3 million to \$12,148.2 million due primarily to the procurement of generators resulting from lessons learned in Operation Desert Storm.

**SINCgars** -- The SAR was submitted because of schedule delays of more than six months. As a result of the April 1992 Operational Test Readiness Review, additional testing was required which delayed completion of first article testing and subsequent production milestones for second source General Dynamics.

**ASPV** -- The SAR was submitted because of delays in excess of six months. Specifically, Milestone IIIB and Initial Operational Capability have been delayed indefinitely pending DOT&E and Navy review of the Operation Evaluation (OPEVAL) report. The estimated costs for the program increased \$0.8 million (+0.1%) from \$561.0 million to \$561.8 million with the incorporation of additional OPEVAL ordnance.

**EA-6B** -- The SAR was submitted because of schedule delays of six months or greater. The Advanced Capability (ADVCAP) low-rate initial production decision was delayed from September 1992 to March 1993, due to a delay in completing the avionics operational testing. ADVCAP operation evaluation was delayed from August 1994 to February 1995 because of a one-year slip to the award of the Avionics Improvement Program. The estimated costs for the program decreased by \$143.5 million (-1.4%) from \$10,204.6 million to \$10,061.1 million, due to revised estimates for contractor and government furnished equipment.

**T-45TS** -- The SAR was submitted because of schedule delays in excess of six months. Completion of technical and operational evaluation slipped because of the test aircraft mishap in June 1992. The estimated costs for the program increased by \$40.0 million (+0.6%) from \$6,396.8 million to \$6,436.8 million, due to a digital cockpit upgrade and an alternate engine competition.

**T-AGOS** -- The SAR was submitted because of a schedule delay of more than six months. Specifically, Initial Operational Capability for T-AGOS 19 class was delayed nine months from September 1992 to June 1993. There were no cost or performance changes reported for the program.

**ACM** -- The SAR was submitted because the unit cost increased 61.2%, causing a Nunn-McCurdy unit cost breach. Action taken to avoid a deficient funding situation on the FY 1987/88 production contracts and the Congressional rescission of \$344 million in May 1992 resulted in a reduction in the total procurement quantity from 640 to 460 missiles. In total, program costs decreased \$132.6 million (-2.7%) from \$4,962.2 million to \$4,829.6 million, due primarily to the quantity reduction and the shutdown costs of the FY 1987/88 production contracts.

**ATARS** -- The SAR was submitted because of schedule delays of six months or greater. The Full-Scale Development (FSD) contract with Martin Marietta was restructured. As a result, the remaining program milestones have been delayed an average of 20 months. The estimated costs for the program decreased by \$35.0 million (-4.4%) from \$797.3 million to \$762.3 million to reflect funding reductions in FY 1994.

**DSP** -- The SAR was submitted because of schedule delays of more than six months in the completion of System 1 development and System 1 delivery to the continental United States Ground Station milestones. The estimated costs for the program decreased \$132.5 million (-1.4%) from \$9,551.0 million to \$9,418.5 million, due primarily to a transfer of funding from the DSP program to the Follow-On Early Warning System (FEWS) program. The initial FEWS SAR is planned for December 1992.

**TITAN IV** -- The SAR was submitted because of schedule delays of more than six months. Specifically, the Initial Launch Capability for the Centaur Upper-Stage has been delayed from February 1992 to December 1992 due to an acceptance test failure of the Digital Computer Unit. The estimated costs for the program increased \$60.2 million (+0.3%) from \$22,674.0 million to \$22,734.2 million, due primarily to a revised estimate associated with solid rocket motors and with assembling, preparing, and launching the first TITAN IV.
